Overview

Micor Company, Inc., established in 1969, continues to be a leader in the development and manufacture of high performance polymer products. Our goal is to produce the highest quality fluid-applied construction products in the industry. With manufacturing and research facilities located in Milwaukee, Wisconsin, Micor offers an extensive line of quality tested polymer formulations for correctional and institutional facilities, food processing, chemical and pulp and paper applications.

Micor leads with innovative technology. Our new products include flexible wall and floor coatings and our Decorative UV Resistant Flooring to protect against total exposure to sunlight. We have a comprehensive product line that meets virtually any application requirement including novalac, vinyl ester, epoxy and urethane products.

Our line of low odor epoxy grouts for healthcare facilities are shipped worldwide. We formulate non-hazardous hardeners that can be shipped by air for critical deadlines.

All our products are formulated to be user friendly for ease of application. We work closely with our certified, experienced installers. Micor prides itself on its commitment to and support of its contractors. Same day or next day shipping is the rule rather than the exception.

Consider Micor a part of your team. Our technical staff provides assistance in evaluating the right product for your applications. We excel in providing customer satisfaction. We look forward to working with you.
